Ray S7® - Advanced mobile accessibility.

When you want a vision-free solution to access the world of digital communications and socializing – and you expect the very best — we present the Ray S7!

The Ray S7 provides dual access to Ray or Android mode with a complete set of accessibility features, including an eye-free user interface, vocal and haptic responsiveness for messaging, voice dialing, and top-of-the-line speech recognition software.

The Ray S7 goes the extra mile, by giving you some of the most advanced voice and touch-operated features available. Features like email, contact management, event scheduling, voice recording, navigation, NFC tag reading, device settings, an audio-book library, location support, and much more.

Intelligently built on Samsung J7 Platform, the Ray S7 is the smartphone to own when you expect a device that is nothing short of perfect, and that gives you complete eye-free access in the most efficient way possible.
